# Security - Export Kerberos KeyTab from Windows Root CA

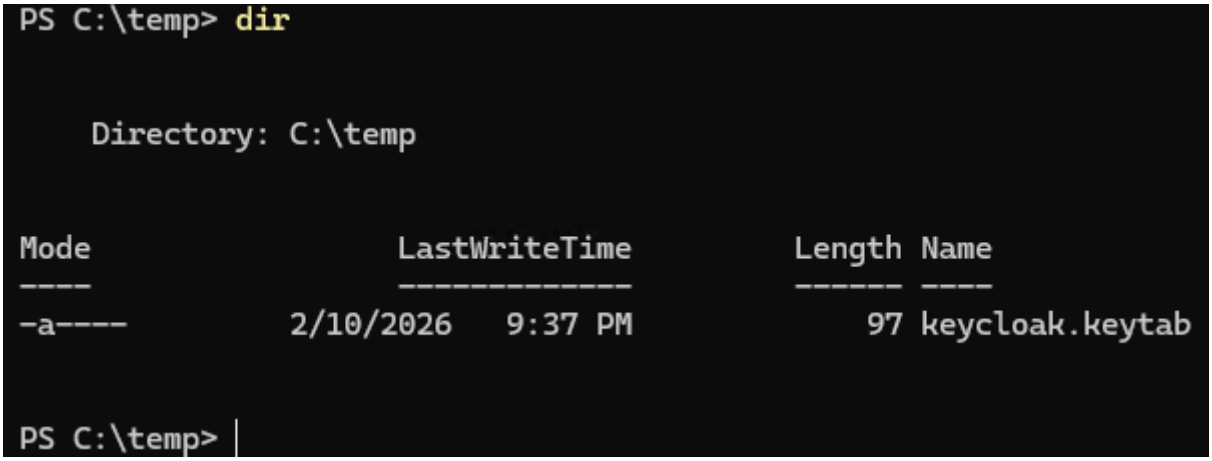

## KeyTab Export

To export the KeyTab from the Windows CA server, in this case it is for KeyCloak mentioned HERE

Run this in PowerShell

```
cd \temp
ktpass -princ HTTP/server.domain.com@SERVER.DOMAIN.COM -mapuser user@DOMAIN.COM -pass '' -crypto AES256-SHA1 -ptype KRB5_NT_PRINCIPAL -out keycloak.keytab
dir
```

This will show you the newly create KeyTab
